3 swing trading examples pdf -
Algorithmic trading is a method
of executing a large order (too
large to fill all at once) using
automated pre-programmed
trading instructions accounting
for variables such as time, price,
and volume to send small slices
of the order (child orders) out to
the market over time. They were
developed so that traders do not
need to constantly watch a stock
and repeatedly send those slices
out manually. Tue, 14 Aug 2018
